Spotlight: Detail/Artist Brushes

Tanis artist brushes are ideal for detail touchup in the automotive, aerospace and defense industries. They come in many shapes and forms for your fine detailing needs. Artist brushes are suited for many applications, especially parts marking, applying adhesives, and general cleaning of small areas.

Camel Hair Flat Lacquering Brush

Part Number	Size	Trim Length	Overall Length
00391	1/4"	9/16"	7"

This camel hair brush can be used for several applications but is very popular for lacquering, general purpose industrial painting and ceramic applications. Ideally used with low-viscosity paint.

Red Sable Marking Brush

Part Number	Size	Brush Diameter	Trim Length	Overall Length
00334	#4	1/8"	1/2"	7-1/2"

Red Sable Marking brushes are used for many different paint and liquid applying tasks as well as general cleaning applications. Red sable has unique properties that allow it to come to a fine point and retain elasticity. Ideal for watercolors, lettering applications and fine touch-ups.

White Bristle Marking Brush

Part Number	Size	Brush Diameter	Trim Length	Overall Length
00281	#1	1/8"	11/16"	11-9/16"

This white marking brush with natural bristle is set in epoxy for solvent resistance and is well-suited for stenciling, marking, detailing and touch-up.

Taklon White Artist Brush

Part Number	Size	Brush Diameter	Trim Length	Overall Length
00292	#2	3/32"	7/16"	7-1/2"

Taklon is a versatile and durable nylon filament that is a great substitute for natural fibers. These artist brushes are of the finest quality and are ideally used for acrylics, watercolor and fabric paints. This round-shaped brush is also great for detailing and stenciling applications.

Gold Nylon Flat Artist Brush

Part Number	Size	Brush Diameter	Trim Length	Overall Length
00224	#8	5/16"	3/8"	7-1/2"

Gold nylon flat artist brushes are made from long-lasting nylon filament that has excellent absorption qualities. The flexible, malleable fibers allow for easy contouring, an even flow, and are ideal for acrylics.
